

CompleteNote

for Vista EHR - Beta Test Program

What is it?

BlenderHouse is looking for physicians and institutions to be part of our beta-testing program for CompleteNote. We need clinical users to try out CompleteNote and provide feedback so that we may improve the product and incorporate new features that are of interest to the beta test audience.

Benefits

- Early access to cutting edge technology and product features
- Close collaboration with development team
- Involvement in the product development cycle
- Full version of iPhone/iPad application for free
- One free permanent server license
- Free support

Program Requirements

- Existing VistA install
- Use CompleteNote for at least 20% of your patients
- Provide feedback on bugs and suggest new features
- Allow BlenderHouse to conduct a time study of your use of CompleteNote
- Signed Beta Test agreement

About CompleteNote

BlenderHouse CompleteNote improves physician productivity while ensuring that patient documentation is complete and accurate. CompleteNote improves productivity by greatly reducing keystrokes and clicks by automatically generating clinical documentation that is individualized to the unique tendencies and preferences of each physician.
